

GBS FastWorks

The Complete Compliance Management Software Solution

Poor compliance and risk management can be financially devastating for any organisation, but with GBS FastWorks, organisations can gain instant control over compliance issues whilst increasing productivity and lowering costs.

GBS FastWorks software is enabling organisations to exploit their investment in Health & Safety (including OSHA), Quality, Environmental and Business Risk compliance by delivering accelerated value back into the business, promoting continuous improvement, reducing costs and the impact of liability and risk.

GBS FastWorks

Fully Configurable

- End users can setup the system to reflect the way they work only seeing the data they need
- End users can define incident types, keywords, categorisations and workflow rules to ensure the information is collected, recorded and distributed to the appropriate people
- Mobile Ready

Workflow and Escalation Enabled

- Our workflow engine routes notifications, escalations and triggers automatically to any email platform
- GBS FastWorks is accessed through a web browser, accelerating user acceptance and global access
- Incidents or incomplete actions are escalated using configurable escalation closing the continuous improvement loop

Runs in the Cloud or On-premise

- You can subscribe to it, run it in your own private cloud, or take it on-premise
- With our cloud offering you can allow end users to access the system with little or no IT intervention

Features

- Seamless integration to any email platform for alerts, triggers and notifications
- Dynamic management reporting on real-time data with drill-down interrogation
- Automated Scorecard & KPI reporting capabilities
- Intuitive design and easy navigation
- Information portals present the right data to your audience
- Integrated HSE Reporting
- Manage Staff Competence & Development effectively
- Produces a "controlled" document register
- Capture observations & initiate near miss reports from mobile devices
- Integrated Action Tracker gives real-time visibility of a person's, teams and site's actions

Benefits

- Centralised compliance data eliminating duplication
- Enhanced data security
- Improved efficiency & turnaround
- Provides an archive of activity, evolution & accountability for a robust legal defence
- Quick and simple implementation with little or no IT “know-how”
- Fast user adoption
- Promotes collaboration, standardisation, delegation and accountability
- Enabling organisations to move to a proactive rather than reactive culture
- Integrated modules help eliminate the complexity of managing organisational compliance

About GBS

GROUP Business Software (GBS) is a leading provider of solutions and services for the IBM and Microsoft collaboration platform. With the Competence Centers Security, Portal & BPM, Mobility and Modernization, GBS enables its customers to manage the challenges of today and tomorrow faster, easier and more targeted.

Customers

More than 5,000 customers and 4 million users worldwide trust in the expertise of GBS

Streamlining your Compliance Processes

GBS FastWorks provides a suite of browser based, fully integrated applications that support the administrative, management and reporting needs of the compliance management process. Modules can be purchased or rented individually presenting solutions that meet all budget, business & operational constraints.

Regardless of the scale of the company, GBS FastWorks is an effective tool for defining and implementing policy, conducting audits and reviews, minimising the risk of product and plant failures and avoiding compliance fines and penalties, as well as the all-important visible reduction in overall costs.

Taking Compliance to the Workforce, Adding Value to the Business

Regular updates to our software reflect the changes in regulatory and industry requirements enabling our customers to remain compliant. By enabling you to reduce the administrative burden of compliance, GBS FastWorks enables you to focus on your other core operational issues.

GBS FastWorks is assisting companies to increase the acceptance of a compliance system and the necessity of a compliance environment.
